PROFILE

Angular developer at Micronatix Technologies, building the eGatePass digital gate pass and visitor management platform used daily by admins and security teams. I turn complex business workflows into clean, fast and responsive web applications with TypeScript, RxJS and Signals, and work closely with backend teams on API contracts and data flow. Focused on performance, maintainable architecture and interfaces that hold up on every screen size.

CORE SKILLS

Frontend	Angular, TypeScript, RxJS, Signals, HTML5, SCSS, JavaScript
State & UI	NgRx, Angular Material, Reactive Forms, Angular Router, Tailwind CSS, Bootstrap
Practices	REST API integration, unit testing, lazy loading, OnPush change detection, responsive design, SEO
Tools	Angular CLI, Git, Postman, Figma, Jira, VS Code

PROFESSIONAL EXPERIENCE

Angular Developer · Micronatix Technologies — Present

Front-end lead on the eGatePass web portal

- Build and maintain the eGatePass Angular web portal used to manage gate passes, visitors and sites.
- Develop reusable components, typed services and reactive forms using RxJS and Signals.
- Designed and prototyped WorkforcePass, a workforce access product, on the shared eGatePass design system.
- Collaborate with backend teams on API contracts and data flow for end-to-end features.
- Contributed to ISO 27001 information security (ISMS) policy documentation.

Freelance Developer · Independent — Ongoing

Client projects and self-run web products

- Deliver Angular web applications and admin dashboards for clients.
- Build and operate SEO-focused web tools, including FileFlip and an internet speed test site.

SELECTED PROJECTS

eGatePass Admin Portal — Micronatix Technologies

Angular web portal behind a digital gate pass and visitor management system. Admins issue passes, approve visitors, manage sites and track entries in real time.

Stack: Angular, TypeScript, RxJS, REST API, dashboards

FileFlip Converter — Personal product

Fast file conversion site for PDF, Word, image and icon formats, focused on SEO, speed and a simple drag-and-drop flow.

Stack: JavaScript, SEO, static site

Internet Speed Test — Personal product

Speed test site for WiFi, LAN and gaming ping checks, with a live gauge and clear results; lightweight and built to rank.

Stack: JavaScript, Canvas, SEO

STRENGTHS

Performance first
Lazy loading, OnPush change detection and lean bundles by default.

Clean architecture
Reusable components, typed services and predictable state.

Responsive by design
Every screen tested from phone to ultrawide.

Security minded
Hands-on experience with ISO 27001 policy documentation.
